Intermediate to Advanced Full Stack Web Developer

We are looking for an experienced, full stack web developer to work with our small but high performing software application development team to build and maintain solutions for our clients running on our bespoke content and eCommerce management engine called Cloudbase™. The ideal candidate for this position is a hands-on professional with strong communication skills and an intimate knowledge of the Microsoft web stack including, but not limited to, ASP.NET Web Forms (C#), SQL Server, Windows Server and IIS. This role will report directly to the Managing Director.

Responsibilities and Duties

- Creating, updating and maintaining applications for the business and its clients who use Cloudbase™ to run their eCommerce businesses and / or manage content on their websites.
- Ensuring that all applications are fit for purpose and well tested using unit and application test processes.
- Controlling and securing the server infrastructure used to host each client's instance of Cloudbase™.
- Site deployment management.
- Leading a small team of developers and designers to achieve the business objectives.
- Reporting to the Managing Director and Project Manager on the progress of the various projects run by the team.

Qualifications and Skills

REQUIRED SKILLS AND EXPERIENCE

- 5+ years in application development and testing using the Microsoft web stack of products (ASP.NET C#, SQL Server, Windows Server, IIS)
- Strong teamwork and leadership skills
- Visual Studio 2016+
- ASP.NET Web Forms (.NET Framework 4.5+)
- C#
- SQL Server 2008+
- HTML and CSS
- JavaScript
- IIS 7+
- Front-end and Backend application architecture and development
- RESTful API development and integration
- Subversion or a similar code repository toolset

IDEAL SKILLS AND EXPERIENCE

- Bachelor's Degree in Computer Science (or related field) plus 2+ years' experience leading a team of developers and designers
- Azure server infrastructure administration experience
- Networking (RDP, Nameservers, DNS, SSL etc.)
- Mobile application development using either Swift for iOS or Java for Android
- Sass for CSS stylesheet management
- Experience with caching and scalable application architecture and coding practices

Remuneration

Remuneration will be discussed with candidates during their screening interviews and will be based on the candidate's experience and skills.
